

## Home Setup

Amy Hagemeyer, Los Angeles

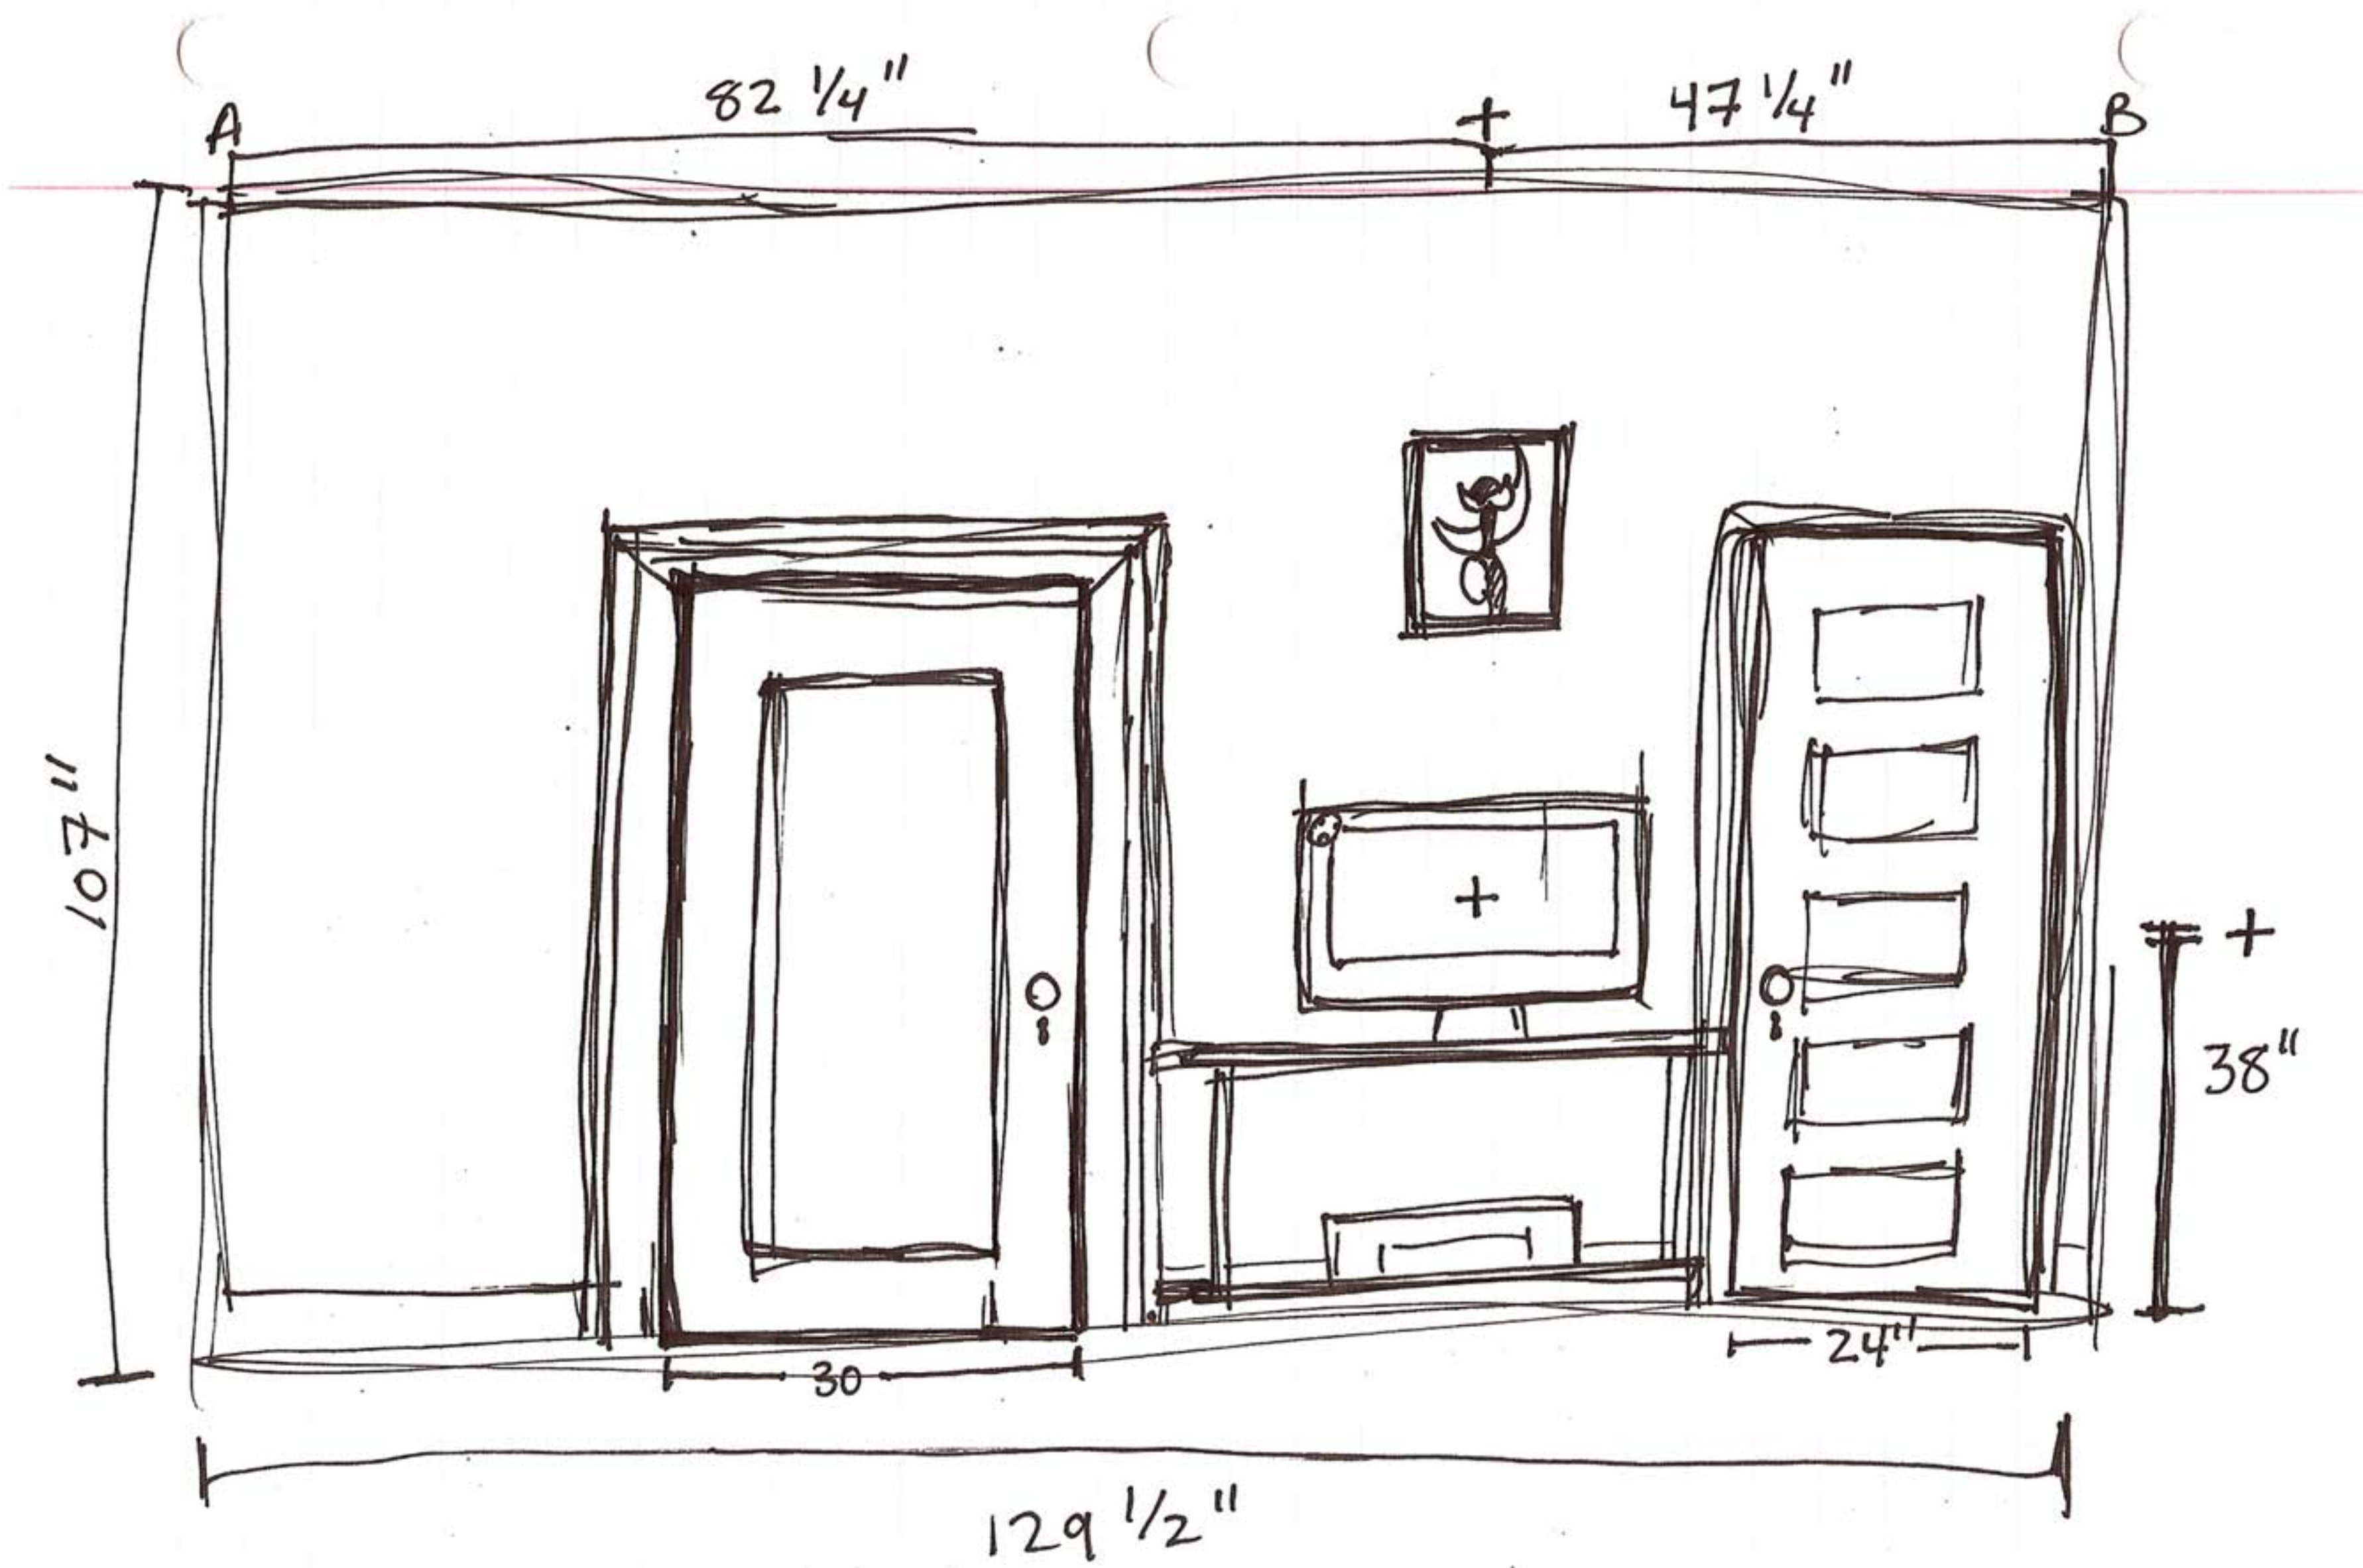

*Note: Tutorial Diversions reminds you to document your own Home Setup before building up any other!*

Amy Hagemeyer's Home Setup is a single wall-bound unit with level integrated speakers and player. In such cases only a single point of reference (the center point of the device described in three dimensions) is necessary for the proportional reconstruction of her setup in your home. If your own setup is made up of modular speaker/player units, simply place the separate loudspeakers directly next to each other.

Amy Hagemeyer's Home Setup is oriented along an East wall. To reconstruct Amy Hagemeyer's Home Setup in your own space, you will need to plug the dimensions of your own East wall into the following equations.

$$\begin{array}{l} \text{_____} \\ \text{Total Height of your East wall} \end{array} \quad \times \quad \frac{38/107}{\text{Ratio of Amy Hagemeyer's Setup to the Total Height of her East Wall}} \quad = \quad \frac{\text{_____}}{\text{Distance from the Ground of your East Wall}}$$
$$\begin{array}{l} \text{_____} \\ \text{Total Width of your East wall} \end{array} \quad \times \quad \frac{47/74}{\text{Ratio of A.H.'s Setup from the Left Side* of her East Wall to the Total Length of her East Wall}} \quad = \quad \frac{\text{_____}}{\text{Distance from the Left Side of your East Wall}}$$
$$\begin{array}{l} \text{_____} \\ \text{Total Width of your East wall} \end{array} \quad \times \quad \frac{27/74}{\text{Ratio of A.H.'s Setup from the Right Side of her East Wall to the Total Length of her East Wall}} \quad = \quad \frac{\text{_____}}{\text{Distance from the Right Side of your East Wall}}$$

\* All references to Right or Left in relation to a given wall are references facing that wall

Height of Wall – 107"

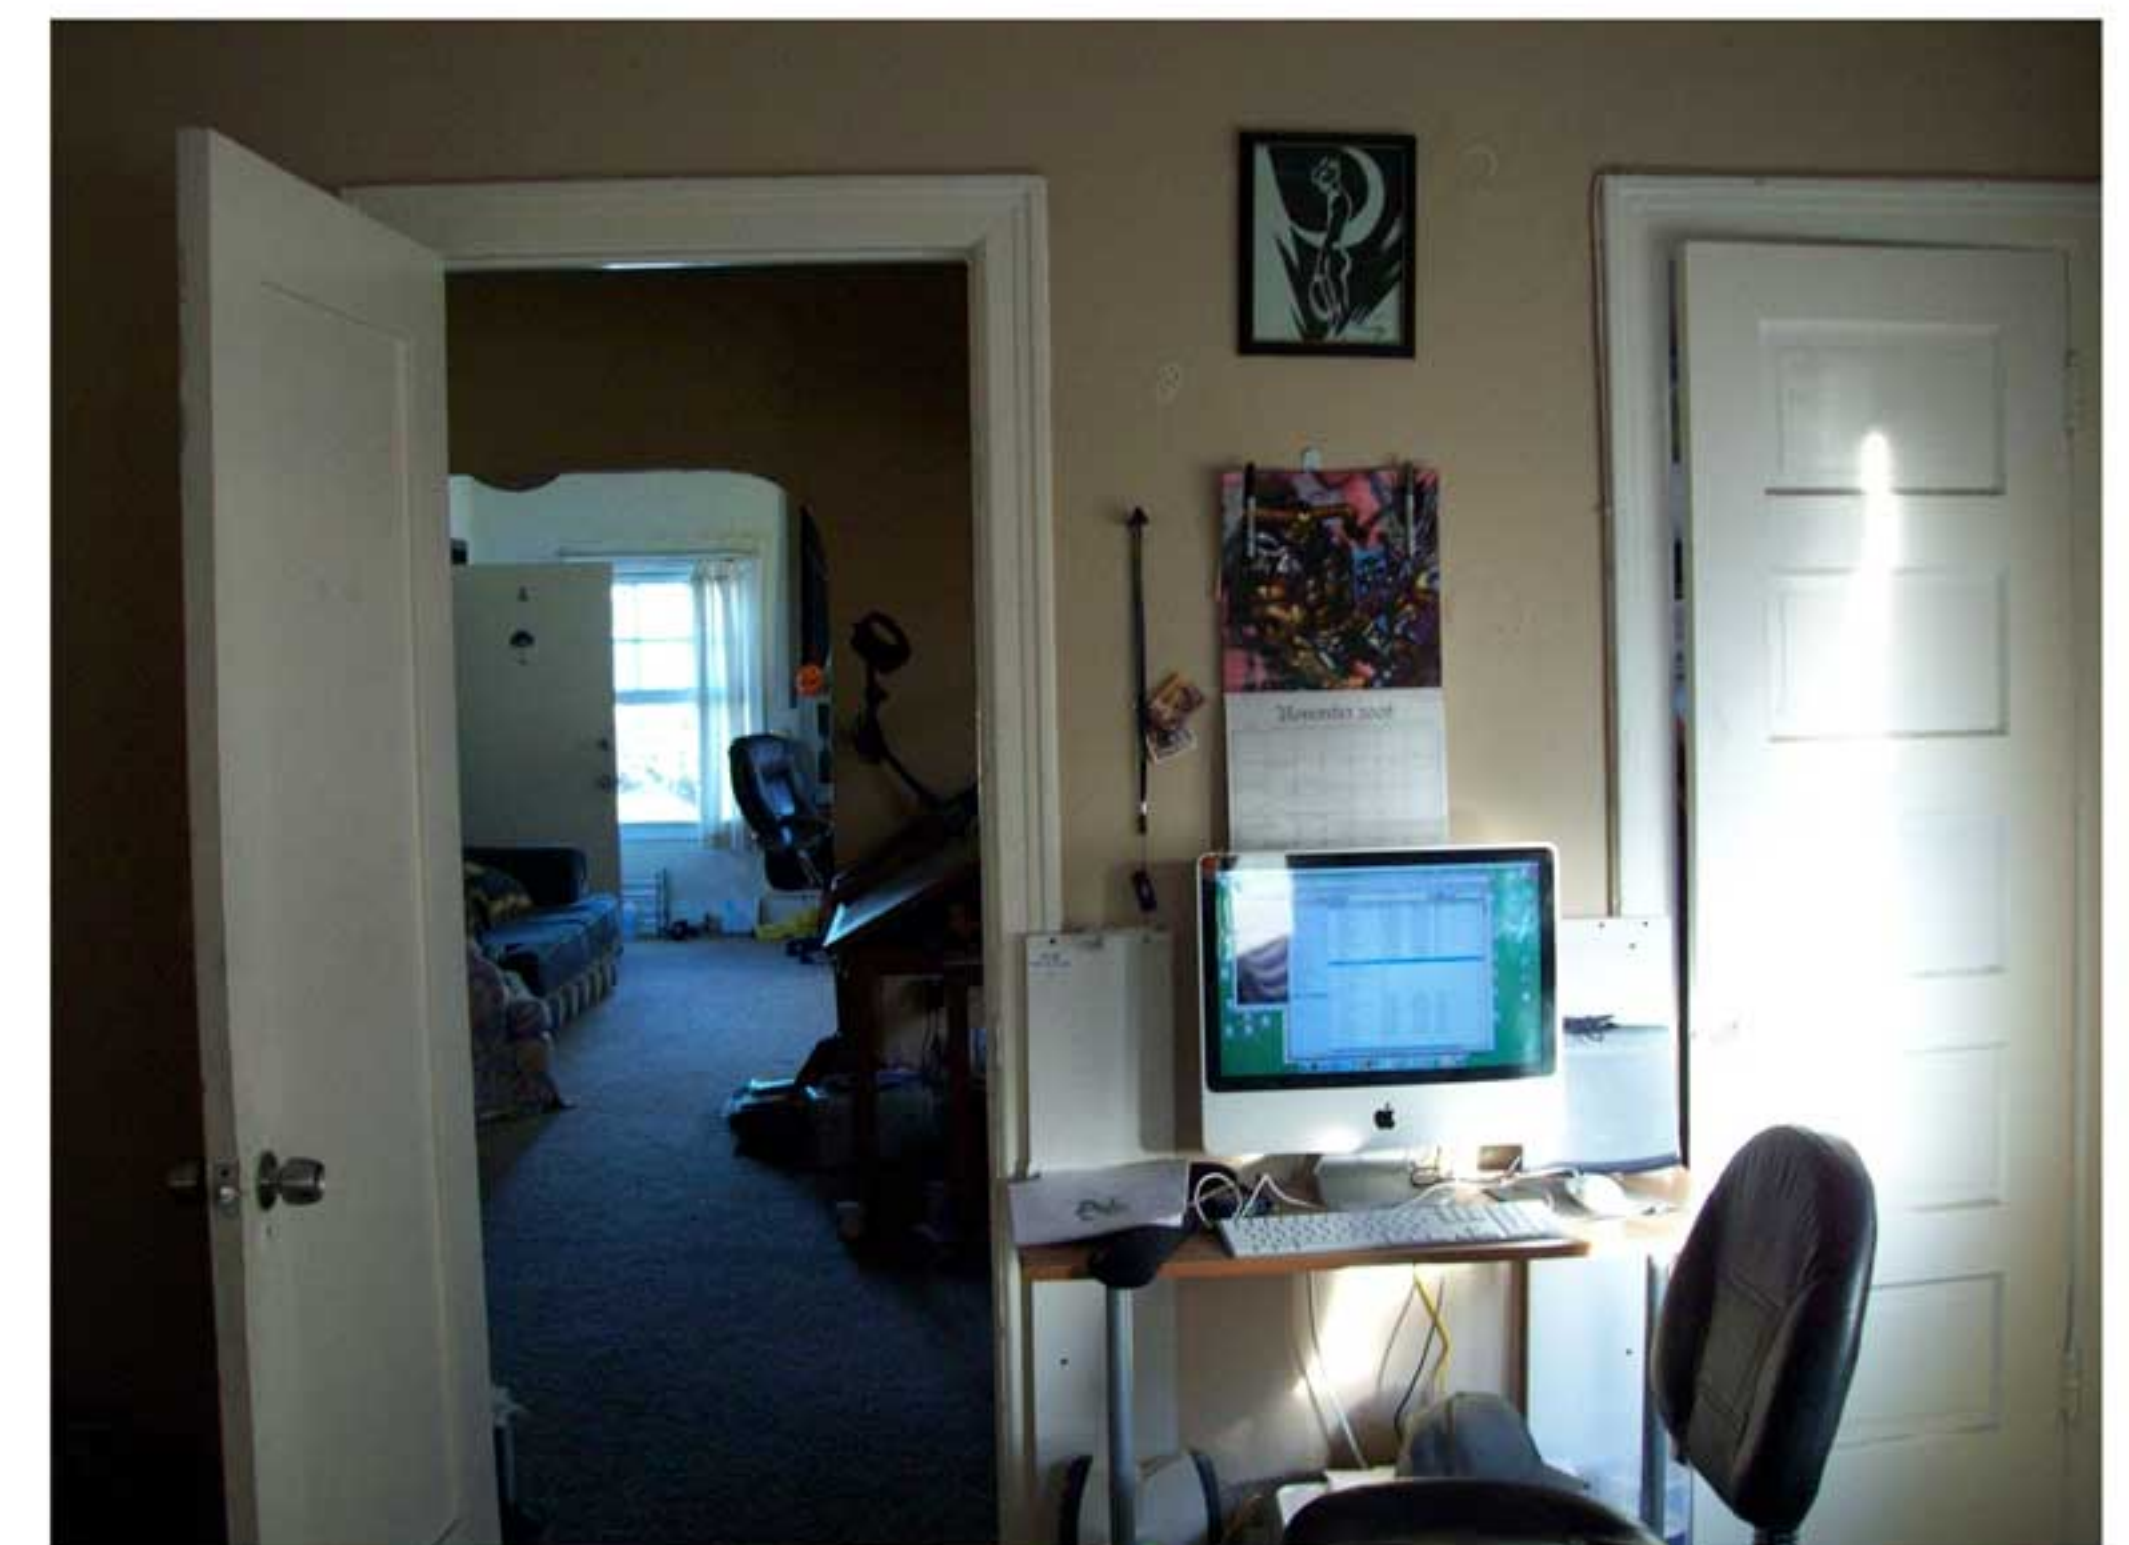

Width of Wall – 129.5"

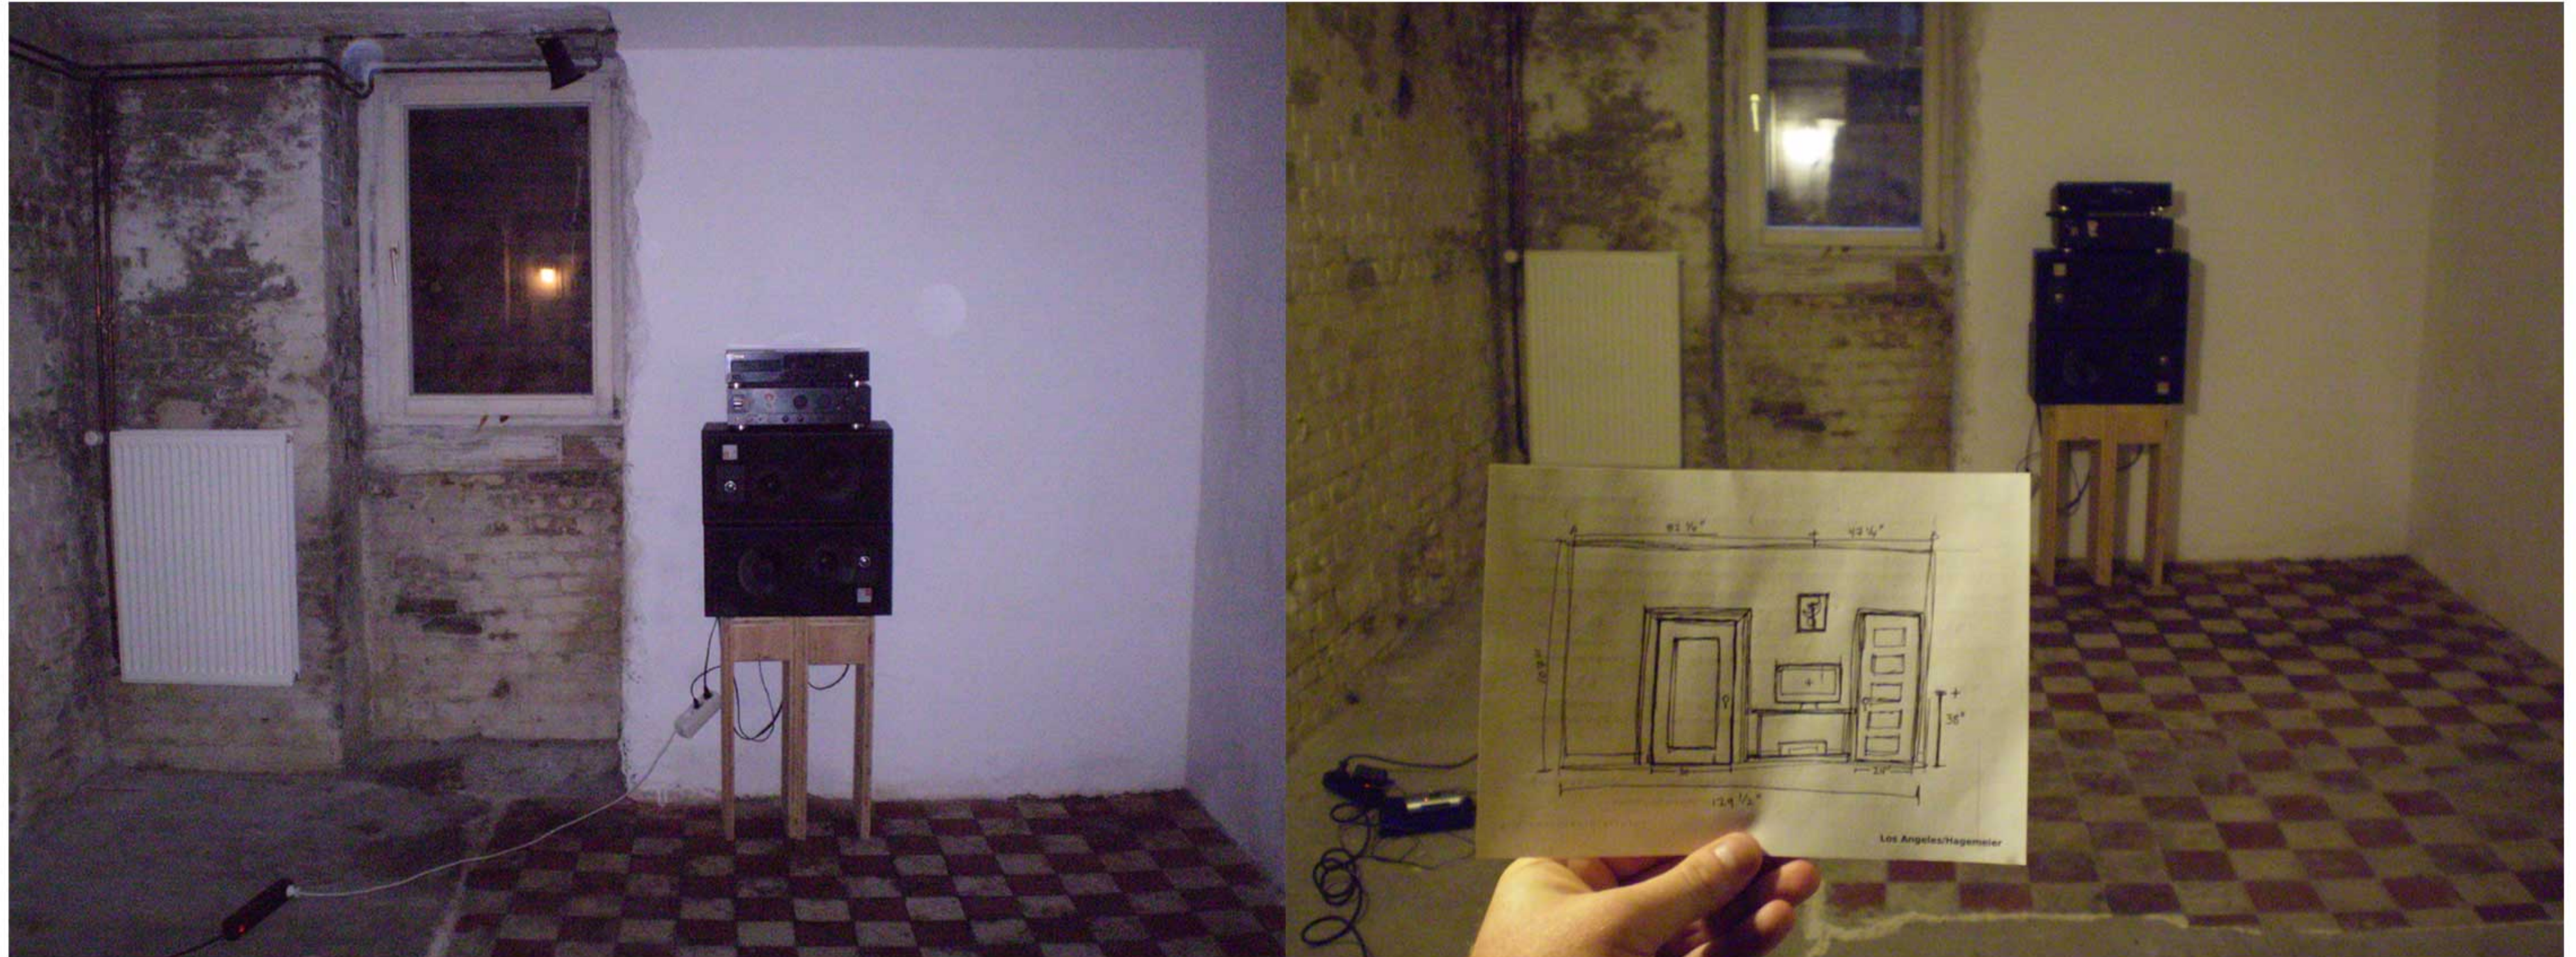

From left side of wall to center of apparatus – 82 1/4"

From right side of wall to center of apparatus – 47 1/4"

From floor to center of apparatus – 38"

The wall is an East wall.
