Suggest the following "Audience Tips"

1. Do Not Talk.
2. The musicians do not need your help, and your neighbors need silence. Learn to tap your toes quietly inside your shoes.
3. Do not have anything in your mouth.
4. Do not wear watches with alarms nor jangle your jewelry.
5. Do not open and close your purse nor rip open a Velcro wallet.
6. Do not sigh with boredom.
7. There are many eyes looking at YOU!
8. To listen means just that. Use the time to turn on a "video screen" in your mind and create a story to music which you are hearing.
9. Do not applaud between movements. You may think the music is over, but is not. You don't want to be the only one clapping.
10. Do not go to the concert determined that you are going to hate the music.
