

Submit your own “Home Setup”

“Home Setup” submissions are welcome in any form (diagrams, blueprints, photographs, etc), but should include adequate data (specific measurements) for the proportional reconstruction of your setup in another’s home.

Submit your “Home Setup” to tutorialdiversions@mail.com or drop it by the “Home Setup Showroom” nearest you.

In the case of the most common wall-mounted or wall-bound stereo system setup, measurements pertaining to the one wall along which your system is oriented are enough. Measurements should be based on the three-dimensional center-points of the individual components of your system (left speaker, right speaker, player, etc) in relation to the respective ends of the given wall as well as the distance to or from the floor or ceiling. Thus along a 4 Meter long wall-axis of A-B (the wall itself being 3 Meters high) one might describe Speaker L (its midpoint) as 1.5 Meters to the right of A, Speaker R as 2 Meters to the left B, the Player as 1.75 Meters to the right of A, and all components 0.75 Meters off the ground. With this data proportionally related to the dimensions of another user’s home/wall, your “Home Setup” can be reconstructed.

In the case of a freestanding stereo setup, please include further information as necessary (dimensions of the entire room, etc).

In all “Home Setup” submissions, please include a cardinal indication (e.g., North).

In exceptional cases, contact tutorialdiversions@mail.com.

Length of Wall: _____

Height of Wall: _____

Left-Speaker Position (horizontal and vertical distances from given wall):

Right-Speaker Position (horizontal and vertical distances from given wall):

CD-Player/Amplifier Position (horizontal and vertical distances from given wall):
